

Protect your goods from temperature & humidity

Predict temperature and humidity risks with Hillebrand's exclusive climatic risks management tool.

Inquire about our insulation system, to protect your goods in a sustainable manner (23% reduction in greenhouse gas emissions compared to a reefer container).

Hillebrand insulation liner benefits

Proven superior protection of your goods door-to-door:

- Thermal shocks
- Extreme temperatures & humidity
- Humidity infiltration
- Container rain (condensation)
- Cross contamination risk
- Bad smells

The Hillebrand insulation liner reduces temperature increases to 8-11°C/14-20°F and protects the goods during transit times up to 40 days and longer*.

Hillebrand insulation liner features

In-house research and manufacturing patented system to maximize the air gap around the liner.

Fully recyclable materials.

94% radiant heat reflection (50% for competitors liners)**.

Available for all containers and pallets.

Temperature reduction of 5°C/9°F compared to others.

Worldwide availability.

Floor covering to ensure hygiene and full sealing.

Convenient: light to transport and easy to fit (7-10 minutes, 1 person for a 20' container).

Food-grade components compatible with FDA.
